

Triple Crown

Appalachian Trail

Trek Planner

Knows where you are, what's ahead, and what you need — without cell service, without a subscription, and without a single unnecessary tap.

The only free, offline-capable planning tool covering all three Triple Crown trails — the Appalachian Trail (2,185 mi), the Pacific Crest Trail (2,653 mi), and the Continental Divide Trail (2,980 mi) — in a single application. No account. No subscription. No ads. Ever.

 Appalachian Trail · 2,185 mi

 Pacific Crest Trail · 2,653 mi

 Continental Divide Trail · 2,980 mi

WHAT'S INSIDE

- 01 Hike Planner — plan any section of any trail
- 02 On-Trail View — GPS, Next Up, Find Trail, emergency coordinates
- 03 Slack Pack Partner Board — find your trail family
- 04 Post a Request — put yourself on the board in two minutes
- 05 Pack Weight Planner — track every ounce, share your setup
- 06 Trek Log — automatic completion tracking via GPS
- 07 Share Your Hike — 1080×1080 share cards for social media
- 08 Water Source Conditions — real-time, crowdsourced
- 09 Bear Sighting Reports — 10-mile radius alerts

Hike Planner

Plan any section — from a single day hike to a full thru-hike.

- Select AT, PCT, or CDT — the app repaints to each trail's color theme instantly
- Choose NOBO or SOBO, set FROM and TO trek segments from dropdown menus
- Set daily start time, hours hiking, miles per day ascent and descent
- Instant stats: estimated arrival, total miles, hiking days, and rest days
- Full itinerary table with sub-hike detail, ascent rates, arrival times
- Download a complete PDF itinerary to take fully offline
- 7,817 miles of AT, PCT, CDT data embedded — zero internet required

▲ Elevation Profile

On-Trail View

The fullscreen is the app. Built for tired hands and dying batteries.

- Next water · next shelter · next resupply — always visible, no tap required
- Emoji icons 🌊 🏠 🍎 on the terrain line — tap any for distance and detail
- Live GPS blue bullseye shows your exact position on the elevation profile
- Coordinates always displayed — one tap copies them for a 911 call
- 20-mile view window centered on your GPS position when active
- **Find Trail** — Google Maps satellite at max zoom, one tap
- **Share coordinates** — SMS pre-written with your exact location

Slack Pack Partner Board

Find your trail family. Browse by state, direction, and proximity.

- Hiker cards with trail name, direction, route, gear style, and bio
- Filter by NOBO/SOBO, state, or **Near Me** — within 50 trail miles
- 48px avatar — uploaded photo or unique color initials per hiker
- **Hiked Together** — publicly declare a shared trail connection
- **View Pack** — see a partner's gear list before you meet on trail
- **YOYO badge** auto-detected from GPS trek log pattern
- Posts live 60 days · Contact info shown only on request

Post a Request

Put yourself on the board in under two minutes. No account required.

+ Slack Pack · Post a Request

ABOUT YOU (140 CHARS)

"Deadhead. Dad. YOYO hiker. Hammock camper. Good company, no drama."

✓ YOYO Detected

 Post to the Partner Board

- Trail name, direction, route pre-filled from your planner selections
- Upload up to 3 photos — first becomes your partner board avatar
- Set pace style, gear philosophy, experience level, and contact method
- 140-character bio — your voice, your trail personality
- YOYO badge appears automatically from GPS alternating direction pattern
- Contact info is private — only revealed when a hiker taps Contact

Pack Weight Planner

Track every ounce. Share your setup with trail partners.

- Three tabs: Base Pack, Food Bag, Consumables — check items on or off
- Total weight updates live in lbs or kg as you build your list
- Seasonal gear suggestions for the right configuration by time of year
- Share icon sends your pack list to your Slack Pack board card
- Partners tap **View Pack** on your card to see your full setup
- Stored locally — fully offline, never leaves your device

 **Pack Weight Planner** 26.31 lbs total

+ Add Item

Trek Log

Your completion record. GPS auto-logs at 90% segment coverage.

- All 38 AT treks listed and grouped by state
- Tap any row: Not Started → In Progress → Completed
- GPS auto-completion at 90% tracking coverage of any segment
- YOYO pattern auto-detected from completed segment direction history
- Completed treks unlock the Share Card for the community feed
- All data stays local and private unless you choose to share

Share Your Hike

One tap generates a 1080×1080 share card for any social platform.

- Trail-themed gradient, your real elevation silhouette, stats, trail name
- Select any completed trek — card updates instantly
- **Save Image** downloads PNG for Instagram, TikTok, Facebook, Strava
- **Share** opens native share sheet with pre-written caption and URL
- **Post Feed** adds card to public Community Feed inside the app
- triplecrowntrekplanner.com watermark on every card — the viral loop

Water Source Conditions

Real-time, crowdsourced. The kind of intel that saves a day on trail.

 **Report Water Condition**

 Tom Floyd Wayside Spring · Mile 969.5

 Excellent — flowing strong, clear

 **Good — reliable, drinkable**

 Fair — flowing slow, filter recommended

 Stagnant — standing, not flowing

 Dry — no water available

Submit Report

Cancel

- Tap any  icon on the on-trail elevation profile to see latest condition
- Five condition levels:  Excellent ·  Good ·  Fair ·  Stagnant ·  Dry
- Reports valid for 7 days — fresh intel, never stale
- Most recent report wins — each new hiker overwrites the previous
- Water source icons recolor on the elevation chart by current condition
- Especially critical in PA & VA dry stretches, and in NH/ME above treeline
- Works offline once loaded — reports sync when you regain signal

Bear Sighting Reports

10-mile radius alerts. One tap to report, one tap to know.

- One-tap 🐻 **Report Bear** button on the on-trail action row
- Submits your current GPS mile and coordinates — no extra typing
- All hikers within 10 trail miles see a red banner alert on their screen
- Banner shows distance, mile marker, time since sighting, and reporter
- Alerts auto-expire after 24 hours — only current threats stay visible
- Black bears active across the entire AT corridor — especially Shenandoah, NJ/NY, and the Whites
- Closing the banner is one tap — you stay informed without being interrupted

Bear sighted 3.2 mi away at mile 1,273

47 min ago by Wandering Bear

Report Bear Sighting

How it protects the herd

Bears generally travel slowly along the corridor. A sighting at mile 1,273 this morning means a hiker at mile 1,276 this afternoon has actionable information — store food properly, make noise, hike in a group, or push past the area before dusk.

The 10-mile radius is calibrated to the AT's pace. No GPS, no alert — your location stays on your device.

ABOUT THE APP

Supporting the Trails

Free. Forever. No ads. 10% of every contribution goes directly to trail maintenance.

This app will always be free. No ads, no subscriptions, no data collection — not now, not ever. Built by a hiker who wanted a better tool and decided to give it away.

If the app helps you walk more miles, you'll see a gentle prompt — no more than four times a year — inviting you to support the trail conservancy of your choice.

10% of all donations from each conservancy's link are returned directly to that conservancy — tracked, transparent, and visible inside the app to every hiker. Because this is the **Appalachian Trail Conservancy** guide, the support link in your sidebar defaults to **ATC**, but every donation reaches the conservancy you choose.
