

Triple Crown *Appalachian Trail*

Trek Planner

Knows where you are, what's ahead, and what you need — without cell service, without a subscription, and without a single unnecessary tap.

The only free, offline-capable planning tool covering all three Triple Crown trails — the Appalachian Trail (2,185 mi), the Pacific Crest Trail (2,653 mi), and the Continental Divide Trail (2,980 mi) — in a single application. No account. No subscription. No ads.

Appalachian Trail · 2,185 mi

▲ Continental Divide Trail · 2,980 mi

WHAT'S INSIDE

- 01 Hike Planner** — plan any section of any trail
- 02 On-Trail View** — GPS, Next Up, Find Trail, emergency coordinates
- 03 Slack Pack Partner Board** — find your trail family
- 04 Post a Request** — put yourself on the board in two minutes
- 05 Pack Weight Planner** — track every ounce, share your setup
- 06 Trek Log** — automatic completion tracking via GPS
- 07 Share Your Hike** — 1080×1080 share cards for social
- 08 Water Source Conditions** — real-time, crowdsourced
- 09 Bear Sighting Reports** — 10-mile radius alerts
- 10 Trail Magic** — the trail-angel directory & giving back

On-Trail View

Turn the phone sideways — this is the only screen you touch on trail: water, shelter, resupply, weather, and your exact **blinking** spot. Gloves on, no click-click.

Two Tabs

Elevation + a live Map. Nothing else to tap.

Next Up

Water · shelter · resupply
— always on screen.

Live GPS

The blue bullseye blinks at
your exact spot.

One-Tap Copy

Your coordinates, ready
for a 911 call.

±10-Mile Window

Auto-centers on you ·
1,266–1,286.

Safety Alerts

Weather, bear & ATC
notices, pushed to your
screen.

Report a Bear

One tap warns everyone
within 10 miles.

Auto-Recording

Tracking logs your hike itself at 90% GPS.

You Write It

Water, bear & trail-magic reports come from hikers
like you.

—— *Far out — the whole trail on one screen, and the only
page you touch all day.* ——

Hike Planner

Plan any section — from a single day hike to a full thru-hike.

- Select **AT, PCT, or CDT** — the whole app repaints to that trail's color theme instantly
- Choose **NOBO** or **SOBO**, set **FROM** and **TO** trek segments from dropdown menus
- Set daily start time, hours hiking, and miles-per-day ascent & descent
- Instant stats: estimated arrival, total miles, hiking days, and zero days
- Full itinerary table with sub-hike detail, ascent rates, and arrival times
- **Download a complete PDF itinerary** to carry fully offline
- **7,800+ miles** of AT, PCT & CDT data embedded — zero internet required

Slack Pack Partner Board

Find your trail family. Browse by state, direction, and proximity.

- Hiker cards with **trail name**, **direction**, **route**, **gear style**, and a short bio
- Filter by **NOBO/SOBO**, state, or **Near Me** — within 50 trail miles
- **48px avatar** — an uploaded photo or unique color initials per hiker
- **Tap your state row** to jump the board; your post stays **editable** anytime
- **Hiked Together** declares a shared connection · **View Pack** shows gear first
- **YOYO badge** auto-detected from your GPS trek-log pattern
- Posts live 60 days · contact info shown only on request

Post a Request

Put yourself on the board in under two minutes. No account required.

- Trail name, direction & route **pre-filled** from your planner selections
- **Upload up to 3 photos** — the first becomes your partner-board avatar
- Set **pace style, gear philosophy, experience level,** and contact method
- **140-character bio** — your voice, your trail personality
- **YOYO badge** appears automatically from your alternating-direction pattern
- Contact info is **private** — revealed only when a hiker taps Contact

Pack Weight Planner

Track every ounce. Share your setup with trail partners.

- Three tabs — **Base Pack**, **Food Bag**, **Consumables** — check items on or off
- Total weight updates live in **lbs or kg** as you build your list
- Seasonal gear suggestions for the right configuration by time of year
- The **Share** icon sends your pack list to your Slack Pack board card
- Partners tap **View Pack** on your card to see your full setup
- **Stored locally** — fully offline, never leaves your device

Trek Log

Your completion record. GPS auto-logs at 90% segment coverage.

- All **38 AT treks** listed and grouped by state
- Two-level tabs — **All Treks** and the new ⚡ **Auto Log**
- Tap any row: **Not Started** → **In Progress** → **Completed**
- **GPS auto-completion** at 90% tracking coverage of any segment
- **YOYO pattern** auto-detected from completed-segment direction history
- Completed treks unlock the **Share Card** for the community feed
- All data stays local and private unless you choose to share

Share Your Hike

One tap generates a 1080×1080 share card for any social platform.

- Trail-themed gradient, your **real elevation silhouette**, stats, and trail name
- Select any completed trek — the card updates instantly
- **Save Image** downloads a PNG for Instagram, TikTok, Facebook, Strava
- **Share** opens the native sheet with a pre-written caption and URL
- **Post Feed** adds the card to the public Community Feed inside the app
- Every card carries a **triplecrowntrekplanner.com** watermark — the built-in viral loop

Water Source Conditions

Real-time, crowdsourced. The kind of intel that saves a day on trail.

- Tap any icon on the on-trail elevation profile to see its latest condition
- Five levels: **Excellent** · **Good** · **Fair** · **Stagnant** · **Dry**
- Reports valid for **7 days** — fresh intel, never stale
- **Most recent report wins** — each new hiker overwrites the previous
- Water-source icons **recolor on the elevation chart** by current condition
- Critical in PA & VA dry stretches and NH/ME above treeline
- Works offline once loaded — reports sync when you regain signal

 **Report Water Condition** ×

SOURCE
Tom Floyd Wayside Spring · Mile 969.5

☒ Excellent — flowing strong, clear

☐ Good — reliable, drinkable

☐ Fair — flowing slow, filter

☐ Stagnant — standing, not flowing

☐ Dry — no water available

Submit Report

Cancel

Bear Sighting Reports

10-mile radius alerts. One tap to report, one tap to know.

- One-tap **Report Bear** button on the on-trail action row
- Submits your current **GPS mile and coordinates** — no extra typing
- Every hiker within **10 trail miles** sees a red banner alert
- Banner shows distance, mile marker, time since sighting, and reporter
- Alerts **auto-expire after 24 hours** — only current threats stay visible
- Black bears active corridor-wide — Shenandoah, NJ/NY, and the Whites
- Closing the banner is one tap — informed without being interrupted

On-Trail · Alerts

Mile 1,276

Bear sighted 3.2 mi away at mile 1,273.
 ✕

47 min ago by  Wandering Bear

 **Report Bear Sighting**

HOW IT PROTECTS THE HERD

A sighting at mile 1,273 this morning means a hiker at mile 1,276 this afternoon has actionable intel — store food, make noise, or push past before dusk. The 10-mile radius is calibrated to the AT's pace.

NO GPS, NO ALERT — YOUR LOCATION STAYS ON YOUR DEVICE.

Trail Magic

Find the angels at the next road crossing — and give back, in person.

- **Trail Angels** give rides, food, a bunk, a shower, a resupply hold, or a gear fix — free, in person
- **Find Magic** — browse by service and tap Near Me to filter within 50 trail miles
- **Confirm in person** — GPS within 25 miles, public count only: no ratings, no reviews
- A **Trail Angel badge** appears after an angel's first confirmation
- **Trail Legend** — the gold tier, earned at **150+ confirmations**, co-recognized by the ATC
- **Be an Angel** in two minutes — pick your crossing & services, confirm Leave No Trace, save a 6-digit claim code
- Contact stays **private**; confirmations are one-way hashed — the “who-confirmed-whom” graph can’t be rebuilt

ABOUT THE APP

Supporting the Trails

Free to use. No ads. 10% of every contribution goes directly to trail maintenance.

No app, no ads, no subscription, no data collection — not now, not ever. Built by a hiker who wanted a better tool and decided to give it away.

If the app helps you walk more miles, you'll see a gentle prompt — no more than four times a year — inviting you to support the trail conservancy of your choice.

10% of all donations from each conservancy's link are returned directly to that conservancy — tracked, transparent, and visible inside the app to every hiker. Because this is the Appalachian Trail Conservancy guide, the support link in your sidebar defaults to ATC, but every donation reaches the conservancy you choose.
